# TECHNOLOGIES

## NITROCORE

NitroCore is a lightweight, glue-free sole that does not sag over time. An eco-friendly technology designed for human comfort and care for nature.

The ATOP system gives you perfect fit control with just one move. Fast, precise, and built for absolute comfort and safety wherever you go.

Double-layer PU rubber - equipped with a combination of specially developed rubber compounds and a unique technical design. Heat resistance +300°C.

The HYPERTEX system shows that while the strongest fabric endures 51,000 cycles, this revolutionary material exceeds 1 million cycles!

ESD footwear prevents sparks when working with flammable substances and protects sensitive electronic equipment.

Heavy-duty genuine leather up to 2.2 mm thick. The tensile strength of the leather is 68% higher than EN ISO 20345:2016.

Cordura

Durable fabric with high vapour permeability and water repellency. Tensile strength is 9 times higher than the requirements of EN ISO 20345:2011, EN ISO 20347:2012-5.5.1.

CrazyHorse

High-quality Crazy Horse leather of increased strength. Water resistance - up to 180 minutes in dynamic conditions (3 times higher than normal).

Full Power Duo System

The outsole with the revolutionary Full Power Duo System tread pattern: increases traction and provides stability on oily surfaces.

# TECHNOLOGIES

---

Toe Cover/  
Toe Cover MAX

Lightweight composite toe box. Protects the toes from forceful impact 200 joules. Made in Italy.

Vildona

The moulded three-layer insole has excellent thermal insulation and absorption properties.

MaxFlex

The anti-puncture Kevlar insole reliably protects the foot from punctures and cuts and has a resistance force of 1100 N.

StaBene

The anatomically shaped footbed makes the shoe comfortable even during prolonged and strenuous use. Reduces the feeling of fatigue.

Perfect Fit

The boots are made from a lightweight material that perfectly adapts to the shape of the foot, ensuring maximum comfort and excellent ergonomics.

Chemical resistant

PVC boots offer reliable protection against chemical exposure, making them ideal for environments where enhanced safety is required.

- Upper material:
    - breathable suede leather;
    - polyurethane net that provides extra protection;
    - protective TPU cover for toe/back;
    - 100% nylon 6.6 Cordura – durable material with water-repellent properties;
  - Lining: light and breathable material Mesh.
  - Membrane ePTFE: waterproof material which provides protection against water penetration in dynamic conditions for more than 48 hours. Also has vapor-permeable and abrasion resistant properties.
  - All upper parts are stitched with waterproof threads.
  - Lacing:
    - durable and waterproof laces;
    - anti-corrosion loops;
    - strong polyamide textile loops;
  - Outsole: PU-Rubber self-cleaning, high temperatures/oil resistant, provides stability on difficult turns and directions (SR)(HRO).
  - Main insole: made of strobel material.
  - Removable insole: three-layer comfortable anatomically shaped insole which absorbs moisture and remains dry in difficult conditions, antibacterial properties.
- Boots made as per Gore-Tex technology.

- Two-component "EVA + Rubber" construction.
  - EVA cushioning layer: effectively absorbs shock loads on joints and the spine.
  - Rubber protector: slip-resistant and highly durable on hot asphalt.
  - Energy-efficient design that returns energy with every step to reduce leg fatigue.

Olive

## ABOUT US

Today, TALAN Group is a powerful association of leading light industry enterprises with a production capacity of 2.3 million pairs of footwear per year and over 10,000 employees. A research and production center for the development, research, and manufacture of personal protective equipment has been established within the TALAN association.

## OUR PRODUCTION

The total production of military footwear was about one million pairs, which is double the level of previous years. The annual total output of footwear was 1.3 million pairs. The average number of employees is 2.3 thousand people. The total amount of taxes paid by the group's companies in 2022 amounted to UAH 486.1 million.

Today, we can confidently say that, over its century-long history, Talan has achieved undisputed leadership in the production of high-quality footwear for occupational safety and health.
